

## Instructions:

1. Use the “arbInput” text file to enter phrases. You can use the phrases already composed in the “Test” file. You can also compose your own phrases as long as you use words that are included in the “Lexicon” file.
2. The structures recognized are:
  - Ism Naat
  - Damir Ism Naat
  - Fial Ism
  - Fial Ism Ism
  - Fial Ism Naat
3. Once you enter a phrase, run the “Prototype” text file.
4. I did not use any IDE, the way I did things is through the terminal.
5. I change the directory to the “Prototype” folder, then run the command “python Prototype.py”
